

Progress check for children aged 2-3 years old.

The progress check at 2 is part of the legal framework and is to be created when a child is aged between 2 - 3.

At Be Happy we will complete the check when a child reaches the age of 30 months old.

If the child starts the setting after this age we will complete the progress check within 4 weeks of the child starting.

If the child takes longer to settle than 4 weeks or has a considerable amount of time off we will reassess the individual situation and complete the check when accurate information is gathered in order to complete a reliable assessment.

The progress check is to be completed by the key person along with the parent to ensure quality and accurate information is used.

The progress check is to be signed by the key person, the parent and quality assured by the manager.
